

04 – Failures, Pivots, and Negatives

Arc

E1 novelty distinguisher failed → forensic: effect-gap not steering search → withdrew overclaim → ca

Failures that mattered

- **E1 / constrained-GP confusion:** conditioned foundry produced no clear novelty vs static specs.
- **Naive tile IR ≠ expand_and_run:** S4 failed until sum+tanh faithful IR.
- **Hop-2:** multi-hop certificate chains not demonstrated; recorded as permanent negative for that
- **One-bitstream-per-skill:** superseded by generic RCF host + hot-load.

What survived

Certified matter with lineage; necessity; MF↔ECR reuse; faithful semantics; RCF package model; stand
